EXPERIENCE

Full Stack Web Developer

DEC 2022 - PRESENT

Artec Manufacturing (Project)

- Developed Artec's primary website using TypeScript, Next.js, and Tailwind CSS.
- Incorporated modern technologies and user-centric design principles to showcase Artec's evolution from inception in 2003 to a premier manufacturer.
- Implemented responsive design techniques for optimal viewing across devices.

CoinFolio (Project)

- Developed CoinFolio, a full-stack cryptocurrency web application, enabling users to track their favorite coins and obtain a 7-day price snapshot.
- The app was built with Next-auth, Prisma, Google provider for authentication, and Trpc as a wrapper for serverless functions.
- Designed the user interface with Tailwind CSS, allowing for easy theming and implementation of dark and light modes.

Popcorn Tracker (Project)

- Developed Popcorn Tracker, a full-stack movie tracking application enabling you to search movies and manage your watchlists.
- Implemented the front-end using TypeScript, React, and Material UI for a modern and intuitive user interface.
- Leveraged Node.js and Nest.js for building the back-end, ensuring scalable and efficient server-side operations.

Artec Manufacturing — IT Support Specialist

JAN 2013 - PRESENT

- Streamline organizational operations through proactive networking solutions and expert technical support.
- Optimize operational efficiency by proficiently setting up and fine-tuning specialized machining tools for enhanced production output.
- Perform backups in critical business resources.
